

# Power Factoring

Enhance working capital and Save time by automatically factoring invoices and bills on autopilot. Auto-factor Netsuite's invoices and bills using no-code templates.

## PRODUCT FEATURES

|                             |   |   |
|-----------------------------|---|---|
| <b>Automatic Factoring</b>  | No need to manually check and alter each transaction separately. Group your transactions into Saved searches and automatically factor them in Netsuite on Save and edit of those transactions.  | Go to list of PowerFactoring Templates. Create New Template, Add Saved search, Factoring company, etc.      |
| <b>Spot Factoring</b>       | Want to Factor a singular invoice? PowerFactoring has you covered. PowerFactoring helps you close the current invoice and move the receivables to the Factoring company.  | Example: Factoring is required for XYZ receivables due to cash flow issues                                  |
| <b>Reverse Factoring</b>    | Want to Factor a singular Bill or the vendor has factored your payable to a third party? PowerFactoring has you covered. PowerFactoring helps you close the current bill and move the payables to the Factoring company.                | Example: XYZ Corp vendor has factored your bill on its end, so payables are now to the factoring company    |
| <b>Buy-back receivables</b> | Want to reverse the Factoring process? PowerFactoring takes it one step ahead by correcting receivables/ payables by understanding the amount received/ paid to the factoring company.  | Example; Factoring company gives the receivable back to you incase of incomplete recovery from the customer |
| <b>Audit Proof</b>          | PowerFactoring helps keep track of all receivable/ payables alteration by PowerFactoring. It provides access to important parameters like alteration date, Factoring Company, PowerFactoring template used, Factored Invoice/ Bill etc. | Example: Find list of all invoices factored by ABC Factoring company  |
| <b>Built For Netsuite</b>   | Say no complex integrations which are slow moving. PowerFactoring is built on Netsuite to help you streamline your operations quickly.  | Contact us. Install the bundle. Start using PowerFactoring.   |
