PowerGL

Eliminate financial inaccuracy and manual effort, and automatically alter G/L postings of Netsuite transactions.. Use no-code templates to alter Netsuite's native G/L posting when transactions meet specific criteria specified by you.

PRODUCT FEATURES

No-Code Templates	Users can experience enhanced experience and ease of use with help of PowerGL templates to define accounts and transaction for GL alteration.	Go to list of PowerGL Templates. Create New Template, Add Saved search and account info.
Automatic GL Re-alteration	No need to manually check and alter each transaction separately. Club your transactions into Saved searches and automatically alter GL on Save and edit of those transactions.	Example: Automatically altering GL for influencer sales
Historical Transactions GL Update	Worried about transactions pending to be altered during financial closing? Now more. PowerGL helps alter the GL of existing historical transaction using PowerGL templates. with a push of a button.	Example: Alter GL of all previous influencer sales which have not been locked or closed.
Audit Proof	PowerGL is GAAP compliant and helps keep track of all GL alteration by PowerGL. It provides access to important parameters like alteration date, PowerGL template used, etc.	Example; Create a report for all transactions updated by PowerGL Template
Error Management	Not sure if PowerGL worked on the transaction or not? PowerGL keeps track of all transactions that missed GL alteration due to any reason.	Example: Find list of all transactions that did not get altered due to any issue
Built For Netsuite	Say no complex integrations which are slow moving. PowerGL is built on Netsuite to help you streamline your operations quickly.	Contact us. Install the bundle. Start using PowerGL.
